WORK EXPERIENCE

AlliHealth

Product Manager (Founder's Office)

Healthcare Technology Startup

Jun 2024 – Present

Bengaluru, India

- Owned the end-to-end checkout experience across the patient journey - from consultation booking to purchase, fulfillment and post-purchase communication - with a strong focus on seamless experience, conversion and operational efficiency.
- Initiated, designed and deployed the entire communication framework across the lifecycle - consultation booking to care and from purchase to fulfillment, including pre, during and post journey communications across WhatsApp, Email, SMS and In-app. Impacting 30K+ consultations every month.
- Led the repeat business for the last 3 quarters, using strategy, experiments and iteration to improve repeat revenue contribution from 33% to 45%.
- Designed and ran multiple product experiments across checkout conversations, lifecycle communication and customer journeys that improved repeat booking conversion from 33% to 50%.
- Reduced internal operational workload by ~30% by designing automation workflows, improving self-service journeys and eliminating manual processes.
- Streamlined the PM, owner closely for about 3 months - in every meeting with the founders. Contributed to making the leadership updates to investors.
- Presently lead the business updates to leadership & founders every week - written & oral communication (covering performance, insights, risks and next steps).
- Led cross-functional execution across Engineering, Clinical Operations, CX and Business teams - from problem discovery to solutioning and rollout - to ensure the needs on the key metrics we were working on.

Cactus Communication

Product Intern

Aug 2023 – Feb 2024

Mumbai, India

Diverse communication and technology company specialising in AI products for research-publishing.

- Conducted competitor analysis, root cause analysis, user funnel analysis and generated data-backed insights to identify growth opportunities.
- Used insights to decide which publication houses / universities to collaborate with - enabling enhanced customer acquisition.
- Managed analysis and reporting using SQL, Excel, PowerTap and data visualization tools.
- Initiated and built a GPT-4 based feature using ChatGPT-4 and Claude to simplify a 10-page journal guideline document into a 10-line summary and compare rules across journals.
- Participated within "100% PRODUCE" title in an on-level product hackathon by Google Cloud.

PRODUCT HIGHLIGHTS

- Actively traded financial markets (derivatives & equity) for 2+ years during college. Managed an account of ₹10 Lakhs, generated ~30% returns in 1 year and traded across financial instruments and vehicles.
- Strong foundation in data-backed problem solving, business sense and a bias for action.
